III.	Candidate Streets for Micropaving.....	5
III.	Non-Asphalt Streets.....	6
IV.	Other Issues.....	6

### APPENDIX A

Assessment Tabulation by Street Name

### APPENDIX B

Assessment Tabulation by Classification and Rating with Cost

## I. PROJECT DESCRIPTION & METHODOLOGY:

This project includes the assessment a little over 165 miles of asphalt streets within the city of Russellville, Arkansas based on the Asphalt Institute's *Pavement Rating System for Low-Volume Asphalt Roads (IS-169)*. Due to the nature of the rating system, concrete and unpaved streets were not rated, but lengths have been tabulated and are included in the Appendix of this Report. Also not included in this assessment are State or Federal Highway systems.

Individual rating forms were completed for 852 street sections within the City, and the results tabulated in a spreadsheet (see Appendix). The rating forms were completed based on field observation of the existing pavement condition and rough measurements of the street sections.

The rating scale is 0 to 100. Based on the Asphalt Institute's guide, streets with a rating of 80 or above are considered to be in good condition, and require only normal maintenance. Streets with a rating below 80 typically require some additional repair efforts (such as an overlay), and streets with a rating below 30 would typically require complete reconstruction.

It should be noted that the primary function of this assessment is as a *relative measurement* to provide a method for ranking roads and streets within the City based on their condition. This assessment should be used as a tool to help guide the City in prioritizing street rehabilitation projects over the next few years. It is not intended to be an absolute measure of the City's street improvement needs. Due to the subjective nature of the assessment, comparisons with past assessments completed by different individuals have limited value.

## II. SUMMARY OF ASSESSMENT RESULTS:

The following table is an overall summary of the asphalt-paved streets including weighted average ratings based on street area and by street classification:

<b>Classification</b>	<b>Total Length (miles)</b>	<b>Weighted Average Rating *</b>	<b>Estimated Overlay Cost **</b>
Arterial	6.86	97.7	\$0
Collector	42.79	85.8	\$1,064,635
Local	116.24	82.3	\$4,065,572
<b>Totals</b>	<b>165.88</b>	<b>84.3</b>	<b>\$5,130,207</b>

\* Based on measured street surface area

\*\* Based on a 1.5" overlay and an asphalt price of \$75 / Ton for streets with a rating less than 80

A more complete overall summary is included in the Appendix to this Report.

The overall weighted average rating for the asphalt street system in the city of Russellville is 84.3. By comparison, the overall weighted average rating for the streets based on the 2009 assessment was 83.5.

The following table is a comparison of the 2002, 2006, 2009 and 2013 average assessment ratings:

<b>Classification</b>	<b>2002 Average Rating</b>	<b>2006 Average Rating</b>	<b>2009 Average Rating</b>	<b>2013 Average Rating</b>
Arterial	85.7	85.3	82.7	97.7
Collector	79.5	88.5	87.2	85.8
Local	79.5	80.3	82.0	82.3

The following table is a more detailed breakdown of the various streets by rating range and street classification:

<b>Rating Range</b>	<b>Length (miles)</b>		
	Arterial	Collector	Local
0 to 39	0	0	2.58
40 to 69	0	3.49	18.94
70 to 74	0	2.68	13.13
75 to 79	0	6.11	11.98
80 to 100	6.86	30.52	69.62
<b>Totals</b>	<b>6.86</b>	<b>42.79</b>	<b>116.24</b>

### III. CANDIDATE STREETS FOR MICROPAVING:

Several streets in the city were identified as potential candidates for a micropaving overlay. Qualifying characteristics for candidate streets include little or no structural deficiencies and beginning signs of surface deterioration.

The following is a list of the identified streets segments along with their condition rating data:

ID No.	Designator	Street Name	Section	Length (miles)	Condition Rating
6773	C	Sequoyah	El Paso to Muskogee	0.482	97
6775	C	Sequoyah	Muskogee to Roundabout	0.593	95
6170	C	Phoenix Avenue, South	12th Street to Fairbanks	0.450	94
7395	C	Vancouver	2nd Place to Bradley Lane	0.090	94
7385	C	Vancouver	West Main to 2nd Place	0.250	93
1870	C	4th Street, East	South Arkansas East to Hwy 7T	0.720	92
7400	C	Vancouver	6th Street to Whipperwill	0.240	92
1090	C	16th Street, East	South Arkansas to 7T	0.760	91
6190	C	Phoenix Avenue, South	Fairbanks to 3rd Place	0.180	91
7390	C	Vancouver	3rd Court to Bradley Lane	0.170	90
4180	L	Gum Street, East	Hwy 7 East to Sandstone Drive	0.450	88
1080	C	16th Street, East	Hwy 7 T East to Hwy 331	1.000	85
6180	C	Phoenix Avenue, South	3rd Place to Hwy 64	0.340	85
7425	C	Vancouver	3rd Court to 6th	0.170	85
7410	C	Vancouver	Whipperwill to 12th Street	0.120	84
6720	C	Russell Road	University East to Weir Road	0.700	78

#### IV. NON-ASPHALT STREETS:

Since the Asphalt Institute's rating system is designed specifically for asphalt streets, it cannot be applied to concrete and/or unpaved surfaces. However, we did catalog the lengths for the non-asphalt streets in the City's street system.

The following table includes a summary of the non-asphalt streets in the City with cost data to pave the unpaved roads:

Classification	Total Length (miles)	
	Concrete	Unpaved
Arterial	0	0
Collector	0.56	0
Local	1.51	0.15

#### V. OTHER ISSUES:

##### Concrete Streets

The City has approximately 2.1 miles of concrete streets. The majority of these streets are in rather poor condition; however, based on the Asphalt Institute's rating system, the streets cannot be meaningfully rated against asphalt paved streets.

##### Unpaved Streets

One unpaved street remains in the city's street network (Timber Line Lane).
